

## Prepaid PIN (Serial ID) Module

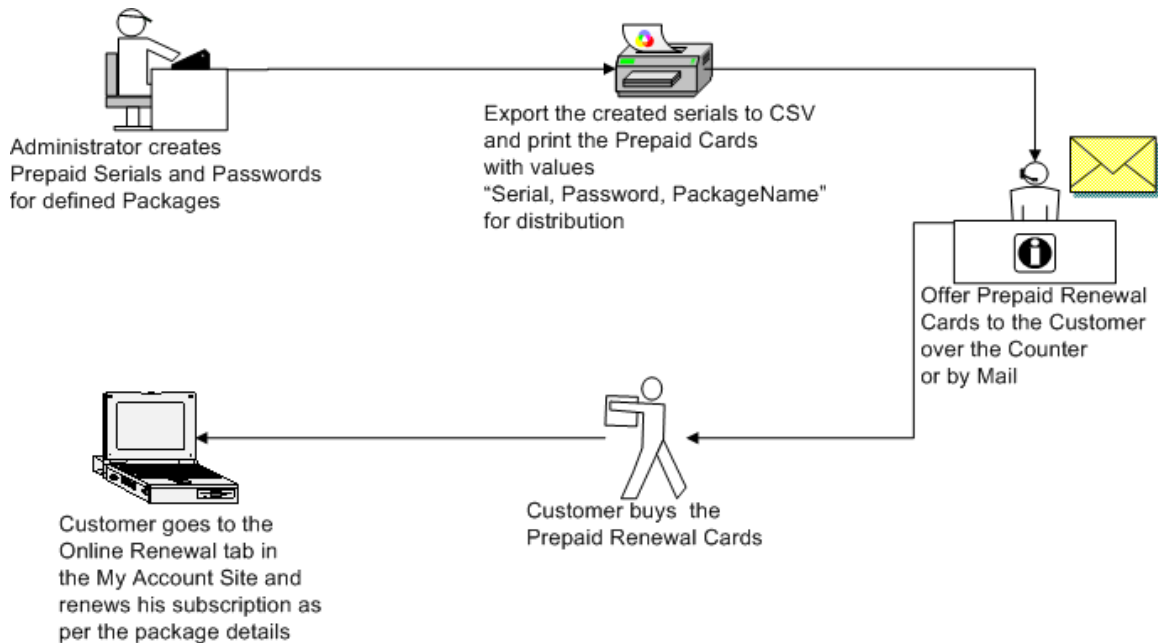

### The Prepaid PIN Solution

24online software offers prepaid pin module which enables online registration of customer and renewal of customers accounts. The service provider can create prepaid pins for online registration and renewal of the selected package.

These prepaid pins and passwords can be printed as prepaid cards (Also known as: Internet Access Pins /Internet Coupons/Vouchers) and sold over the counter by the service provider. The customer can then register or renew his account from the web login or from my-account site using this prepaid pin and password. The customer would be credited Internet access as defined in the package.

### The Work flow

The following diagram shows the work flow for Prepaid Renewal serials.

## Prepaid Renewal: Add On Module
