

Walk-in Module

24online software offers walk-in module which enables customer to directly access Internet using walk-in Pins and Passwords. Customer does need to register/create his account. The service provider can create Walk-in Pins of the selected packages.

These walk-in pins and passwords can be printed as prepaid cards and sold over the counter by the service provider. This module is useful for Café's, Hotspots, Hotels for providing Internet access to customers eliminating any requirement of customer to register its account before accessing Internet.

Walk-in Pins Process Flow

Walk-in: Add On Module
