Elitecore Rolls out Hospitality Internet Access (HIA) Solution Series

The HIA appliances branded as “24online” are now available with advanced features dedicated to growing Hospitality Vertical...!

24online, product of Elitecore Technologies, offering complete wired and wireless (Wi-Fi) billing & bandwidth management solution to ISP & Hospitality segment globally, launches comprehensive high speed internet appliance based solution dedicatedly for hospitality solution with advanced features and revived look & feel suiting the hospitality environment.

24online comes-up with HIA series, highly flexible and plug-n-play solution that offers high speed Internet experience to guest and visitors to small and large hospitality locations. A secured solution in compliance with the lawful interceptions issued by the government bodies (TRAI & DoT) to provide secured Internet services. It bundles the comprehensive appliance based solution with latest and advanced features that are demanding in the current hospitality industry. 24online HIA is compatible to accommodate hospitality properties with 50 to 5000 rooms. And clients have the benefit to choose the appropriate solution from the series, depending on the hotel network.

Mr. Akshat Joshi, Product Head - 24online says, “Keeping in view the growing demand for comprehensive & plug-n-play solution with loaded features like PMS integration, SMS integration, captive portal, payment gateway etc. we look forward to penetrate the hospitality segment at a higher level”. Adds **Mr. Samiksh Aggarwal, Head Sales - 24online**, “HIA series will be available in different range of models at a cost effective price to cater the mid-size and large hotels by which clients are free to choose appropriate solution according to their usage network”.

24online HIA meets the requirements of hotel & apartment chains with worldwide locations, offering centralized controls and a user database through a centralized 24online server at the Network Operations Center (NOC). It facilitates room wise - location wise schemes, differential rate plans, PMS integration and location based charging on premises, enhancing profitability. It also enables location wise attractive user login page for single location or multiple locations as per the hotel network. 24online can be customized on all levels to suit any language and to change the user and administration interface. It supports using any currency, floating point values and multiple taxes.
